---

<b><u>ANSBACH AREA:</u></b>	FIRE	(09802) 19217 or (09802) 83117
	AMBULANCE	(09802) 83116 or (09802) 19217
	MILITARY POLICE	(0981) 183114

<b><u>ILLESHEIM AREA:</u></b>	FIRE	(09841) 19217 or (09841) 83117
	AMBULANCE	(09841) 83116 or (09841) 19217
	MILITARY POLICE	(0981) 183114

---

All fires, even extinguished ones, will be reported to the Military Fire Department without any delay. This does not only apply to Government owned housing facilities, it requires also reporting of any incident within the Leased Housing areas and on the economy. The US Army Fire & Emergency Services Division will perform investigation of the fire. Evidence pertinent to the cause of fire will not be removed, disturbed, or cleaned until the investigation is complete.

2. **REFERENCES:** In accordance with 235<sup>th</sup> BSB Regulation 420-90, Fire & Emergency Services dated 10 September 1997 and NFPA Standards occupants of family housing units must comply with below listed requirements to prevent the creation of hazardous situations as well as fires within the building. Family housing sponsors are responsible for fire prevention in their quarters and storage areas. They will ensure that family members are familiar with fire prevention procedures, and as a minimum, they know how to report a fire and evacuate their quarters.

3. **FLAMMABLE LIQUIDS AND COMPRESSED GAS CYLINDERS:** Procedures and precautions for handling and storage of flammable and combustible liquids are prescribed in NFPA Standard 30, Flammable and Combustible Liquid Code.

AETV-WG-A

SUBJECT: Appendix E to Installation Housing Management - Policy # 14

a. The storage of full, partially full, or used empty gasoline containers is prohibited in any occupied structure. Only new or steam cleaned empty containers can be stored indoors. Bulk storage of flammable liquids such as paint, oil etc., will not be stored in any housing building. Flammable liquids will not be stored or transported in glass or plastic containers. Flammable liquids and oil will not be dumped or disposed into sinks or into the sewer system. The use of gasoline or any other flammable liquid having a flash point of less than 100 °F (37.8°C) for cleaning purposes is prohibited. Only approved cleaning solvents will be used. Draining gasoline tanks or refueling gasoline-operated equipment inside buildings and structures is prohibited. Flammable liquids will not be stored in domestic type refrigerators because a fire and explosive hazard will be created. Gasoline will not be used to thin paints.

b. Compressed gas cylinders, as well as batteries, will not be stored in any portion of the housing facility. This includes also propane gas cylinders for barbecue grill usage. Only the usage of one small propane cylinder for the purpose of gas grilling is granted. Cylinder used for this purpose must comply with NFPA code requirements and must therefore be equipped with an OPD (overfill protection device). The OPD equipped valve is easy to identify by its trilobal (triangle shaped) hand wheel and the "OPD" stamped in plain sight. While grill is not in use, the gas cylinder will be stored in a secured area in the basement, not accessible for children and protected from "misuse". Usage of grills within the facility or on balconies is prohibited. Grilling is only authorized outdoor, staying away from facilities at least 5 feet.

c. Motorcycles, motor scooters and gasoline-powered equipment will not be stored in any portion of the housing facility. Motorbikes are considered to be a POV and therefore any storage or parking within the facility is strictly prohibited.

4. HOUSEKEEPING: Good Housekeeping and orderly cleanliness is a basic factor in maintaining an adequate fire prevention program throughout all facilities and areas. The correct disposal, limitation, or separation of combustibles to reduce the danger of fire is important.

a. Trash will be allowed to accumulate inside of any building. Once waste paper baskets become full, they will be emptied into trash containers outside the building.

b. The storage of any kind of material on or under stairs or in the path of any means of egress is strictly prohibited. The use of unoccupied attic spaces for storage is prohibited. Unoccupied attic spaces will be kept free of any kind of combustible materials, also clean and secured to prevent unauthorized entry.

c. Lint filters of dryers will be cleaned on a regular base to prevent dryer from

AETV-WG-A

SUBJECT: Appendix E to Installation Housing Management - Policy # 14

overheating. For this purpose, the filter will be removed and accumulated lint will be removed. Dryers will not be overloaded with clothes.

d. Every required exit, exit access, or exit discharge shall be continuously maintained free of all obstructions or impediments to full instant use in the case of fire or other emergencies.

5. ELECTRIC WIRING AND APPLIANCES: Installation, replacement or alteration in building or structure owned or controlled by the US Army, or connection of interior or exterior wiring to electric power sources is prohibited unless approved by the DPW.

a. Automatic circuit breakers will not be taped, fastened or altered. Electric fuses will not be bypassed or replaced with substitutes or fuses having a higher ampere rating.

b. Electric wiring will not be looped, nailed, hooked or otherwise fastened by using non-approved methods. Extension Cords will only be used if a flexible connection is necessary and will not be substitute for fixed wiring. Extension cords will be utilized only in continuo length without taped or spliced sections. Such cords will not be tacked, stapled, or fastened to wooden elements or walls, tied to or draped over pipes or other supports. Extension cords will be protected against mechanical damage and will not be placed under rugs and carpets. Cords will not run through windows and/or doors to prevent damage of insulation. Sufficient wall outlets need to be available to run electrical devices to prevent extension cords from overloading.

c. All electrical appliances, excluding those designated to run continuously will be turned off while not in use. Kitchen stoves will not be left unattended while turned on and cooking is in progress.

d. Transformers supporting 110 Volt appliances will only be used if the power output of the transformer is higher than the total input power of the appliance connected to the transformer. If transformer does not support the electrical appliance, it will not be used.

e. All electrical appliances used within housing units should be UL, VDE or GS approved. This labeling will guarantee to the user, that the equipment has been tested and is considered to be safe if proper used.

f. All electrical installations and equipment will conform to applicable regulations and codes.

AETV-WG-A

SUBJECT: Appendix E to Installation Housing Management - Policy # 14

g. Smoke detectors are installed for the safety of housing occupants. Tampering with those is strictly prohibited and will result in disciplinary actions. Power supply for those detectors will never be interrupted and batteries (where it applies) will be replaced when battery gets weak. The occupant should test Smoke Detectors at least once a month by using the small test button on the detector. Once automatic fire alarm detection system installed in hallways is being activated, the building must be evacuated immediately and the Military Fire Department has to be notified without any delay by calling above listed emergency number.

6.
